RE: MIDDLETON - American Glue &  
Resin, Inc. - 40 School St.  
DEQE Case No. 3-168

Dear Chief Nash:

Based upon the conversation you had, on Monday February 23, 1987, with Ida Babroudi of this office, this Office concurs with the local fire department's decision to require the removal of the two underground tanks (gasoline and toluene) from American Glue & Resin, Inc. site. This action should not jeopardize site investigative measures currently being undertaken by the company pursuant to a Notice of Responsibility letter issued by the Department of Environmental Quality Engineering on December 29, 1986.

In addition, in order to keep you informed of the site conditions we will put your name on our mailing list for any correspondence from DEQE to American Glue regarding flammable liquids and/or underground storage tanks.

If you have any further questions, please contact Ida Babroudi at the letterhead address or 935-2160.

Very truly yours,

Richard J. Chalpin  
Deputy Regional  
Environmental Engineer
